Work Experience

Amadeus Software Labs

Jan 2024 - Present

Software Engineer

Bangalore, India

- **Angular Development:**
 - Led feature development for airline projects using Angular and Otter Library, creating a responsive, user-centric interface that drove significant business improvements. Collaborated across teams to implement scalable solutions, achieving a 25% boost in user engagement and 15% reduction in customer support inquiries through strategic design and cross-functional teamwork.
 - Effectively translated complex client requirements into precise technical specifications, ensuring seamless implementation. Presented project progress with in-depth technical insights, proposing optimized solutions to enhance system performance and functionality, thereby increasing client satisfaction rate up to 95%.
 - Developed features now deployed across 15+ major airlines, including Kuwait Airlines, significantly streamlining operational efficiency and enhancing industry-wide performance.
- **Chrome Extension Development:**
 - Led the development of an in-house Chrome extension, utilizing advanced DOM manipulation to allow real-time UI customization for Angular applications. Built with **JavaScript and Node.js**, this tool enables designers to instantly adjust component-level variables, streamlining the UI iteration process.
 - Developed design iteration extension for airlines, reducing design turnaround time by 40% and improving collaboration between design and development teams.

Software Engineer Intern:

Feb 2023-Dec 2023

- **Automation Script Development:**
 - Developed Robot Framework automation scripts for Marriott and MGM Hospitality Reservation System using Python, reducing manual testing efforts by 40% and significantly improving overall testing efficiency.

Education

National Institute of Technology Agartala

Agartala, India

Bachelor of Technology, Electrical Engineering

2019-2023

CGPA: 8.1

Skills

- **Languages:** HTML, HTML5, CSS, JavaScript (ES6), TypeScript, C++, C, Python
- **Libraries, Frameworks:** ReactJS, Redux, ExpressJS, NodeJS, React Testing Library, Tailwind
- **Tools and Software:** Docker, Jenkins, Git, JIRA, Rest API, Postman, Webpack, NPM
- **Database:** MySQL, MongoDB
- **Subjects:** Data Structures and Algorithms, Object-Oriented-Programming (OOPS), CI/CD, Software Development Life Cycle (SDLC), Agile Methodology, Operating System, Database Management System

Projects

- **ClassConnect– An Edtech Platform ([Link](#)) :-** *ReactJS, NodeJS, MongoDB, and ExpressJS*
 - Created a fully functional ed-tech platform that enables users to create, consume, and rate educational content.
 - Implemented a separate Instructors section, allowing instructors to upload and create courses and a Students section, that allows students to consume course content and keep track of their ongoing courses.
- **Shope – A Online ecommerce website([Link](#)) :-** *ReactJS, Redux, JavaScript*
 - Created the user interface for an E-Commerce website, which allows users to add & remove items to/from cart & buy them.
 - Used Redux state management library to keep track of the cart items and implemented Dark/light modes theme option.
- **SpendWise – Personal Finance Manager** *C++, Data Structures and Algorithms*
 - Designed and implemented a personal finance manager that categorizes expenses, tracks income, and monitors savings goals, enabling users to make informed financial decisions.

Achievements & Certification

- **Amadeus Ideathon Winner:** Top 5 out of 262 entries and 600+ participants for an innovative, business-driven idea.
- Achieved Microsoft Certified: Azure Fundamentals (AZ-900).
- Oracle Cloud Infrastructure 2024 Generative AI Certified Professional
